- Juniper Networks
- McAfee
- Microsoft
- Novell
- Oracle
- RSA
- Sophos
- Sun Microsystems
- Symantec
- Trend Micro

And more...

The Current Analysis **Enterprise Security** module delivers comprehensive coverage of this rapidly evolving market. While some segments of the market have reached relative maturity, others are just emerging. Overall, the market is extremely dynamic, with new vendors continuously entering and leaving.

Coverage areas include:

Threat Management - The systems, both hardware and software, that aim to either prevent or detect intruders on a network or prevent viruses from causing damage, respectively. Coverage includes network-based and host-based IDS/IPS, data loss prevention, and content security systems (i.e., antivirus, anti-spam, etc.) deployed at the desktop, servers and gateways.

Network Access Control - The coverage takes an expansive view of the evolving NAC market. A complete NAC solution should include the following capabilities: host posture checking, quarantine and remediation, identity-aware and policy based authentication and resource access control, and post admission threat protection, quarantine, and remediation.

Security Management - The overlay of solutions that provides additional command and control capabilities to security systems. Security management solutions include security event and information management and risk management systems.

Identity Management - The software, hardware and service infrastructure that allows companies to create, manage, and authenticate user identities and broker services based on those identities. Identity management involves four major tasks: authentication, authorization, access control, and audit.

Firewall & IPsec/SSL VPN - Covers enterprise remote access and site-to-site security technologies.

About **Current Analysis**

Current Analysis provides Competitive Response solutions that enable companies to effectively anticipate and counter competitive threats, and win more business. This is achieved through the rapid delivery of tactical, actionable intelligence to help fast-paced companies compete in the highly volatile telecommunications, networking, and business software markets.

This CurrentCOMPETE™ module includes:

- **Customizable email updates** delivered either daily or weekly to alert subscribers of the module to new analysis available in key areas of interest.
- **Actionable event reports** which provide rapid analysis of significant competitive events in the market including new product releases, M&A activity, trade show announcements and newly formed alliances.
- **Company Assessments** which provide in-depth analysis of individual companies and analysis of their competitive positioning in specific market segments.
- **Market Assessments** which provide analytical evaluations of specific market segments, including market size, projected short-term and medium-term market growth and stability, business and market drivers as well as company ratings.
- **Comparison feature** allowing module subscribers to create dynamic, side-by-side comparisons of companies' strengths and weaknesses.
- **Product Assessments** provide a timely and in-depth evaluation on how leading products and services in a market measure up to their competition.

How We Deliver

Current Analysis is the preeminent source for tactical competitive intelligence and analysis. Our CurrentCOMPETE™ platform provides real-time analysis of breaking industry events, as well as intelligence reports on the markets, companies and products that are shaping the telecom, networking, and business software industries. By providing timely and comprehensive intelligence, we enable organizations to successfully counter competitive threats, and offer effective solutions to emerging challenges.

Our business model and solutions are built on the foundation of solid, quality intelligence and data, making **Current Analysis** the leader for competitive intelligence demands. We serve more than 30,000 users at over 250 enterprise clients, representing preeminent firms in the telecommunications, information technology and consumer electronics industries.

Current Analysis retains over 40 worldwide industry experts. Their frontline perspective and industry experience ensures you receive the best market information and analysis available - delivered within 48 hours of major industry events.
